

FeatherFlex™

HVE/SE Adapter

Increase comfort and maneuverability!

Leave heavy valves and stiff hoses behind! The FeatherFlex Adapter connects a low volume evacuator to any high volume suction valve by way of a 72" long lightweight hose. In turn, you get more than high volume suction through a low volume aspirator, you also get reduced hand fatigue and improved maneuverability.

FeatherFlex works with all standard 1/4" diameter low volume aspirators, including MirroVac, Fast Dam and Total Comfort. To clean, simply flush along with other evacuator lines. Blue vinyl hose and anodized aluminum fittings ensure durability.

11115 FeatherFlex HVE/SE Adapter

FeatherFlex is lightweight, ergonomic and efficient.

Leave HVE valve in holder!
