

GLECO TRAP® HV SYSTEM

High-Volume Plaster Trap

Full-sized Gleco Trap HV allows pre-drainage for completely dry, mess-free plaster trap changeouts.

Invented by a plumber, the Gleco Trap brings revolution to the age-old chore of sink trap retrieval and plaster trap maintenance.

From the inventor of the original Gleco Trap, the Gleco Trap HV Sanitary High-Volume Plaster Trap brings the same clean, dry and simple maintenance to full-size plaster traps. Never again will you soak your cabinets and yourself with foul-smelling, contaminated wastewater when you change your plaster trap container.

The Gleco Trap HV features a specially-engineered air-tight lid with threaded inlet and outlet extensions that reserve an air pocket inside. When the trap is full, simply remove the air-release plug to drain all inlet and outlet plumbing into the container before disconnecting. Its patented design prevents the mess and contamination that frequently occurs with the removal of traditional plaster traps.

Instead of leak-prone flexible hoses found on other traps, the Gleco Trap HV uses standard 1½" threaded inlet and outlet ports to ensure a positively leak-proof assembly. Adapts easily to existing plumbing.

Each kit includes a heavy-duty container, all 1½" PVC plumbing components to fit most sink configurations and instructions. Some modification of provided connectors is required.

11010 3.5-gallon Gleco Trap HV System

11011 5-gallon Gleco Trap HV System

11012 3.5-gallon Gleco Trap HV Refill Container

11013 5-gallon Gleco Trap HV Refill Container

10410 Gleco Trap HV installation kit includes replacement PVC plumbing components only.

1. Release air to pre-drain.

2. Remove full container.

3. Connect new container.
